Vi är glada att i samverkan med *American Congress of Rehabilitation Medicine* här i Sverige kunna erbjuda den internationella kursen

Cognitive Rehabilitation Manual; Translating Evidence-Based Recommendations into Practice.

Kursledare kommer att vara någon av författarna till manualen: **EC Huskins, K Cicerone, K Dams-O'Connor, R Eberle, D Langenbahn, and A Shapiro-Rosenbaum**

Kursen riktar sig till dig som arbetar med personer med kognitiva nedsättningar och problem. Den ges på engelska och omfattar 2 dagar.

Välkommen med din anmälan!

This introductory training teaches evidence-based interventions for impairments of **Executive functions, Memory, Attention, Hemispatial neglect, and Social communication**

Learning objectives of the course

1. Use a decision-tree to assist in determining which type of cognitive rehabilitation to implement.
2. Describe techniques for improving attention and the steps involved in carrying out treatments.
3. Identify the general guidelines for the use of external memory strategies.
4. Describe a general algorithm and conceptual framework for structuring interventions for awareness, executive functioning and behavioral/emotional self-regulation.
5. Discuss the evidence concerning the effectiveness of cognitive rehabilitation in the selection and implementation of specific, individualized interventions for cognitive disability.

Statement of need and target audience

ACRM Cognitive Rehabilitation Training presents **evidence-based** standards and guidelines for clinical practice and translating them into practice. The interventions can be readily used by occupational therapists, speech and language therapists, psychologists, and other rehabilitation professionals.
